API

WHAT IS AN API

Application Programming Interface

“ When people speak of “an API”, they sometimes generalize and actually mean “a publicly available web-based API that returns data, likely in JSON or XML”. The API is not the database or even the server, it is the code that governs the access point(s) for the server.

THANKSGIVING

25 - 27 November 2015. Thanksgiving was originally celebrated as a day of giving thanks for the blessing of the harvest and of the preceding year. In United States, Thanksgiving is celebrated on the fourth Thursday of November, making it a long-weekend holiday followed with Black Friday and Cyber Monday next. Here are the top 10 foods with the highest popularity spike during this event:

1.

534 mentions about 'turkey' + keyword 'craving' on this day.

Its rank went up by 38, previously from #50 to #12.

POSTMAN

API testing is a type of software testing that involves testing application programming interfaces (APIs) directly and as part of integration testing to determine if they meet expectations for functionality, reliability, performance, and security.

[Download](#)

Version 7.8.0 | [RELEASE NOTES](#) | [PRODUCT ROADMAP](#)

Not your OS? Download for Windows ([x32](#) / [x64](#)) or Linux ([x64](#))

The screenshot shows the Postman application window. On the left, there's a sidebar with a 'History' tab showing a single entry for 'July 3' with a 'GET' request to 'postman-echo.com/get'. The main area contains a request editor with fields for 'Method' (GET), 'URL' (postman-echo.com/get), and 'Authorization' (set to 'Inherit auth from parent'). Below the editor is a 'Response' section with the placeholder text 'Hit the Send button to get a response.' At the bottom right of the main window, there's a blue 'Send' button. The top right of the window displays the version '7.8.0' and links to 'RELEASE NOTES' and 'PRODUCT ROADMAP'. A callout box at the top right says 'Not your OS? Download for Windows (x32 / x64) or Linux (x64)'.
